

Select Survey .NET

Basic Training **v5**

SelectSurvey.NET Basic Training

v.5.0 6/2019

In this course, students will learn all the basic functionality of SelectSurvey.NET including creating surveys, deploying surveys and viewing reports.

Getting Around the Application

Login

Using an internet browser or mobile device, click on or enter the URL link provided by your company or organization to login. You should see a login page that looks like the image below.

The login page is 100% customizable so your login page may look different than this. The login page can be customized by an admin user via the admin tools. Normally this is configured during the initial installation or account setup. If you need help configuring the look and feel of the application, ClassApps has designers that can help you by designing the login page and survey look and feel templates to match your organization's branding. For more information, email sales@classapps.com or tech@classapps.com.

In addition to customizing the look and feel of the login page and other pages in the application, admin users can also customize the text that shows on the forms as well as the text in any pop up or on page validations that appears on the pages. Text can be edited from the admin tools – Globalization and Translation pages by an admin user.

Companies have the ability to hide the registration link and the forgot password link from admin tools > application wide settings.

Logout

Remember to click Logout when you are finished. Click your name in the upper right corner then click the green “Logout” button.

Changing your Password

Your password must be 8 or more characters long and contain at least one lowercase letter, one uppercase letter, AND one symbol OR number.

1) Check your email for the verification code and enter it in the box

Password Requirements:

- 1) must be 8 or more characters long
- 2) must contain at least one lowercase letter
- 3) must contain at least one uppercase letter,
- 4) must contain at least one symbol (!,@,#,\$,%^,&,*?;_~,-,£,(,)) OR number.
- 5) You cannot reset your password with your last/current password.

Steps with screenshots:

- 1) Click LOGIN button

STATE UNIVERSITY

If you would like to log into the application, please click [here](#).

LOGIN

Please enter the ID of the survey you wish to take in the box below.

Enter Survey ID

TAKE SURVEY

Questions? Contact the survey administrator at cit@easternct.edu

Click LOGIN button

2) click "Forgot Password"

STATE UNIVERSITY

Enter Username

Enter Password

SIGN IN

If you forgot your password, please click [here](#).

Click "forgot your password" link text

3) Enter your email address in the box and click "SEND"

STATE UNIVERSITY

Forgot Password

Please enter your email address below. You will get an email and have to enter a verification code.

Enter your email address and click "SEND"

4) Open your email and copy the verification code that was sent to you.

Verification Code for SelectSurvey.NET Inbox x

[Redacted] .edu via sendgrid.net
to me ▾

Verification Code: [Redacted]Gk6rqip0kUhtFg

right click copy the verification code, to paste in the box

5) Right click in the box and paste in your verification code then click "SUBMIT"

STATE UNIVERSITY

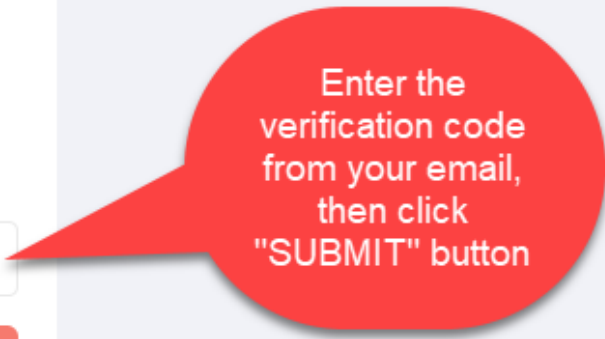

Forgot Password

Check your email for the verification code and enter it in the box below.

Verification Code

SUBMIT

CANCEL

A red speech bubble callout with a white border and a shadow, pointing towards the verification code input field. It contains white text.

Enter the verification code from your email, then click "SUBMIT" button

5) Enter your new password in both boxes. Make sure it meets all of the password requirements, and cannot be your past password.

SELECTSURVEY.NET V5

You must change your password, enter NEW password below:

Password Requirements:

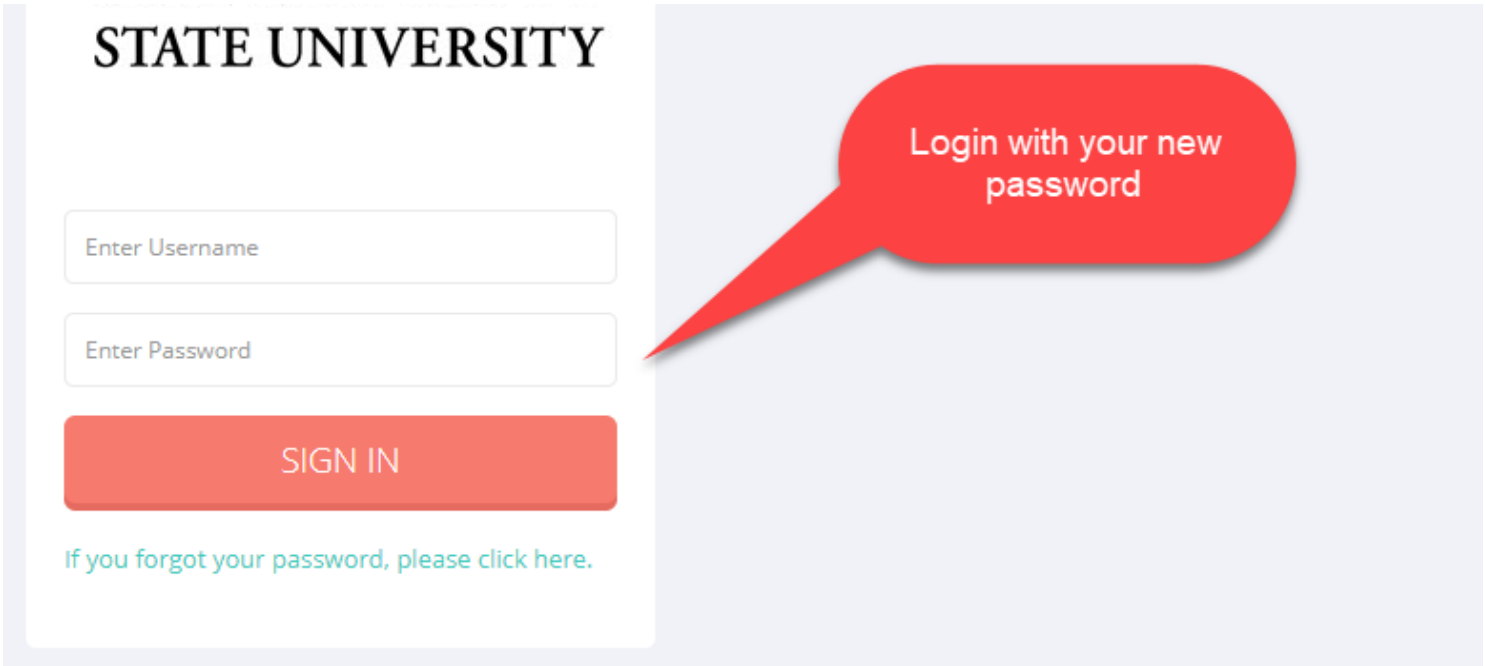

- 1) must contain at least one lowercase letter
- 2) must contain at least one uppercase letter,
- 3) must contain at least one symbol
(!,@,#,\$,%^,&,*?_~,-,.,,)) OR number.
- 4) You cannot reset your password with your last/current password.

CHANGE PASSWORD

Powered by SelectSurvey.NET v5.025.002

Enter your new password in both boxes then click "CHANGE PASSWORD"

6) Login with your new password

Dashboard

The below image is the Survey List Dashboard window that you will normally see right after logging in. Eventually you will see all of your surveys listed here.

The large icons at the top of the page are clickable, click the large plus sign to start creating your first survey. Click the large question mark for help.

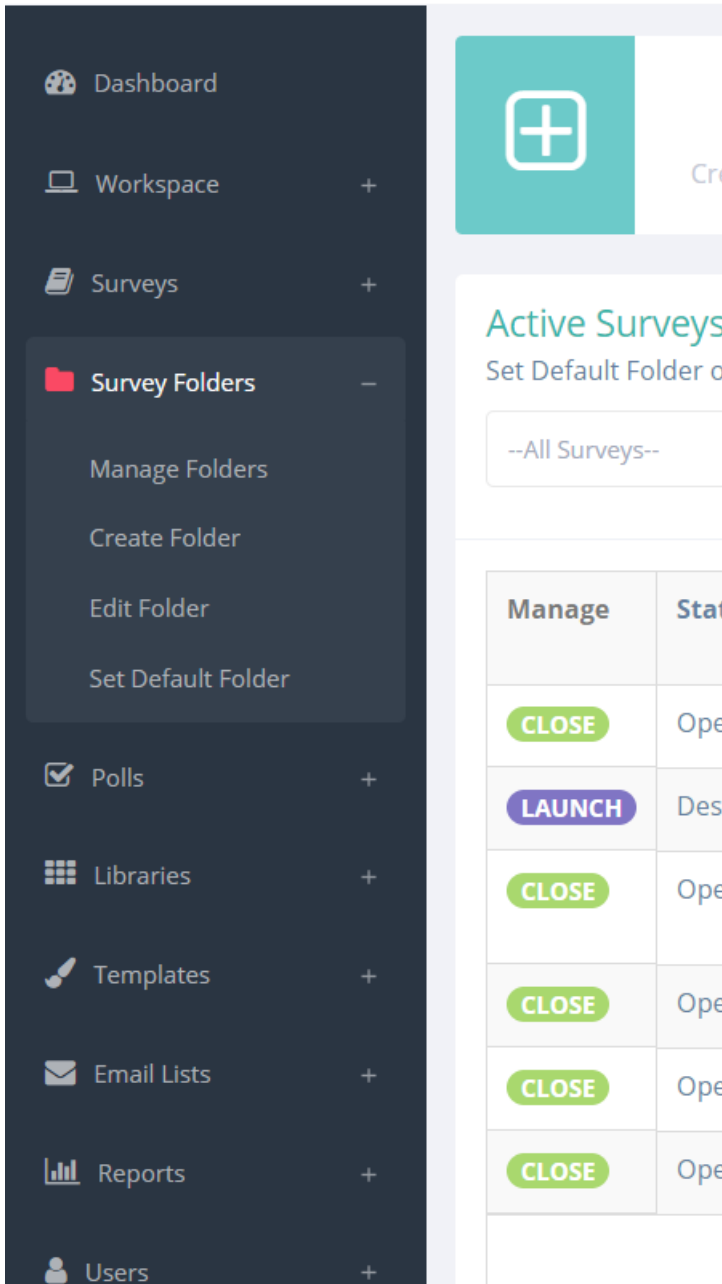

The screenshot shows the SELECTSURVEY.NET V5.0 dashboard. At the top, there are four summary cards: 'Create Survey' (5), 'Email Lists' (100), 'Reports' (121), and 'Help' (Customer ID: 622998). Below these is the 'Active Surveys' section, which includes a search bar and a table of surveys.

Manage	Status	Title (click to preview)	Date Created	Design	Options	Deploy	Analyze	Total	Comp/Incomp.	Archive	Delete	Clear
LAUNCH	Design	Smileys	02/07/2018	✓	📄	📧	📊	0	0 / 0	🗄️		
CLOSE	Open	test for star question type	10/12/2017	✓	📄	📧	📊	1	0 / 1	🗄️		🗑️
CLOSE	Open	test3	10/08/2017	✓	📄	📧	📊	1	0 / 1	🗄️		🗑️
CLOSE	Open	test2	10/08/2017	✓	📄	📧	📊	0	0 / 0	🗄️		
CLOSE	Open	test	06/21/2017	✓	📄	📧	📊	19	6 / 13	🗄️		🗑️

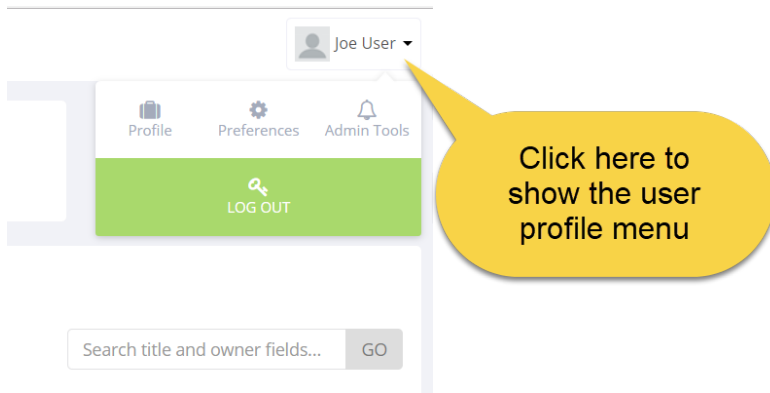

To collapse the left menu, click the menu icon as shown below:

This screenshot shows the same dashboard as above, but with a yellow callout bubble pointing to the hamburger menu icon (three horizontal lines) in the top left corner. The bubble contains the text: 'Click to collapse left menu for more screen space'.

To get to any page click the text links in the left menu. You can expand the folders in the left navigation as shown below by clicking on them.

In the right hand corner you will see the name of the person logged in. If you click the dropdown next to your name, you will see a menu containing a link to edit your profile, user preferences and to logout. If you are an admin user you will also have access to the admin tools.

To search for a survey:

- From the **Manage Surveys** page type a survey's name or owner in the search bar and click **go**.

Manage	Status	Title (click to preview)	Date Created	Design	Options	Deploy	Analyze	Total	Comp/Incomp.	Archive	Delete	Clear
LAUNCH	Design	Smileys	02/07/2018					0	0 / 0			
CLOSE	Open	test	06/21/2017					19	6 / 13			

To access all surveys in a folder:

- From the **Manage Surveys** page click the dropdown arrow in the **Browse Survey Folders** field and select the folder
- Click **Go**

Active Surveys

Set Default Folder on User Preference Page

--All Surveys--						
Default Folder						
--Surveys Not In Folders--

Manage	Status	Title (click to preview)	Date Created	Design	Options	Deploy
CLOSE	Open	Test Survey	02/09/2018			
LAUNCH	Design	Smileys	02/07/2018			

Creating Surveys

You can create surveys from scratch, or from copies of other surveys. When you create a survey from a copy of an existing survey, you can also copy the responses as well. Copying surveys with responses is a great way to backup a survey and save those responses, and to redeploy the original as an updateable 360 survey so the respondents can update their responses from the prior quarter, or year.

With only one click you can copy a survey and then launch it. There is also an option to import questions from Excel into your new empty survey.

Create a Survey from Scratch

You will have to create your first survey from scratch. Once you have a survey created you can use it to create more surveys.

Manage	Status	Title (click to preview)	Date Created	Design	Options	Deploy	Analyze	Total	Comp/Incomp.	Archive	Delete	Clear
LAUNCH	Design	Smileys	02/07/2018	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	0	0 / 0	<input type="checkbox"/>		
CLOSE	Open	test for star question type	10/12/2017	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1	0 / 1	<input type="checkbox"/>		<input type="checkbox"/>
CLOSE	Open	test3	10/08/2017	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1	0 / 1	<input type="checkbox"/>		<input type="checkbox"/>
CLOSE	Open	test2	10/08/2017	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	0	0 / 0	<input type="checkbox"/>		
CLOSE	Open	test	06/21/2017	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	19	6 / 13	<input type="checkbox"/>		<input type="checkbox"/>

Enter the survey title, check “From Scratch” radio button, then click “Save”.

Create Survey
Create a new survey either by starting from scratch or by copying an existing survey.

New Survey Options

Title:

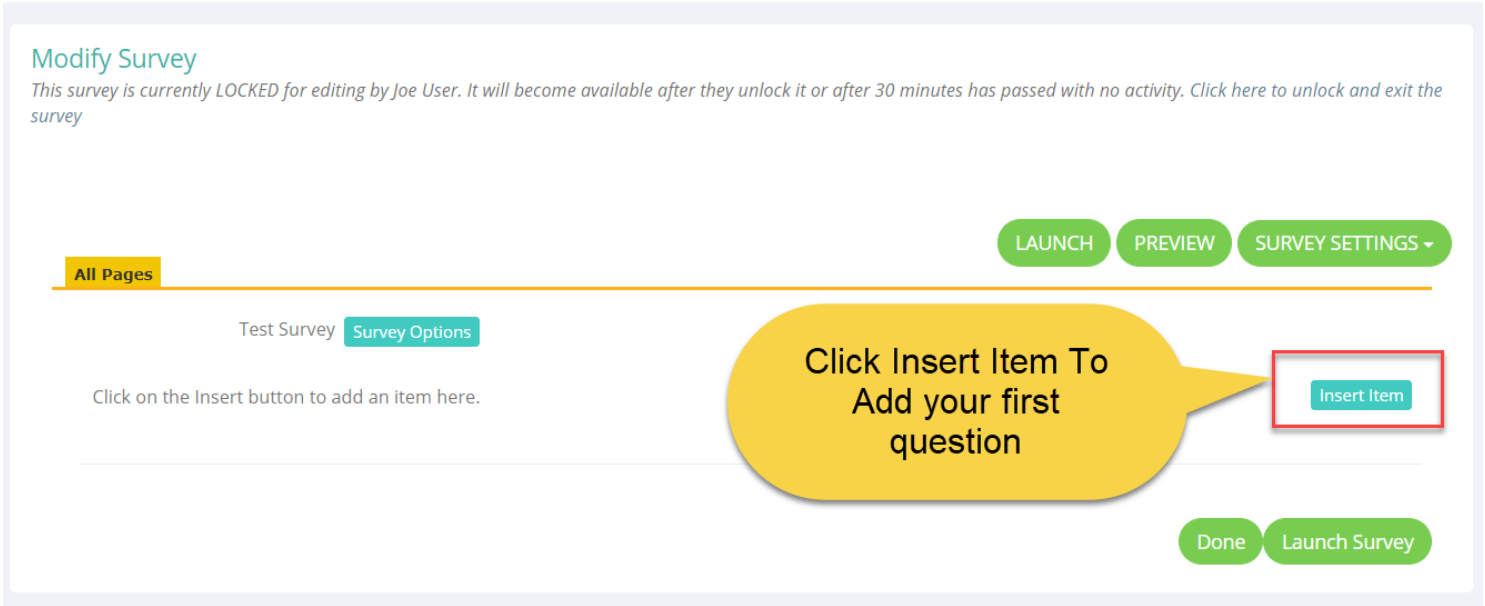

From Scratch -- Create a new survey from scratch (access key is s)

From Existing -- Copy survey from an existing survey in this database. (access key is e) Survey:

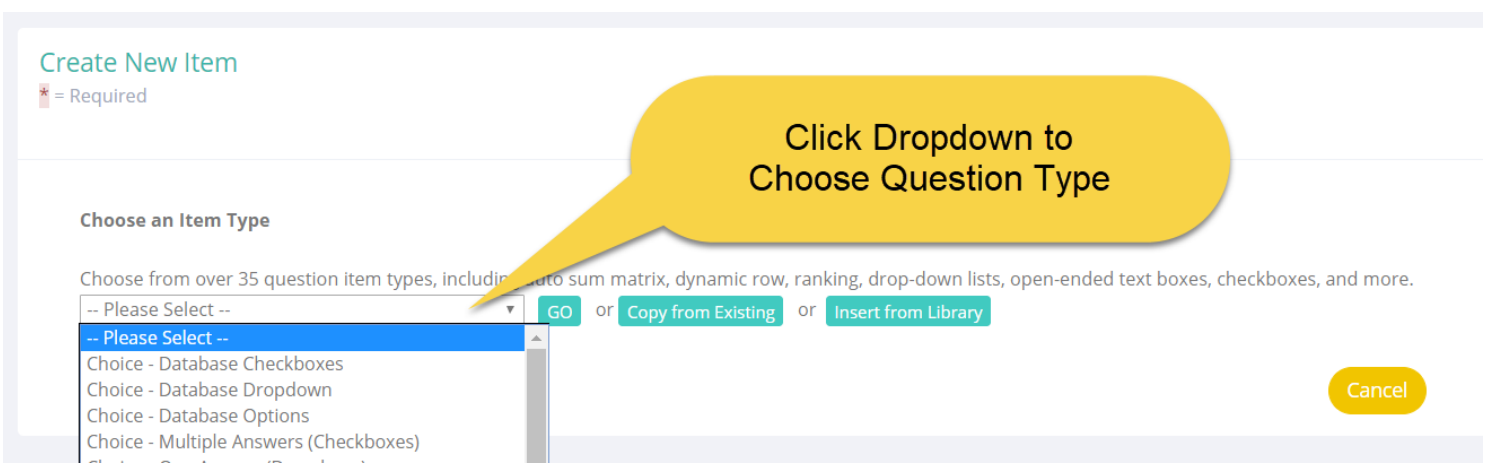

Copy Responses -- Copy responses in addition to survey.

Other Options
 Copy/Import Survey From Other Database: [Click here to Copy/Import Survey from another server.](#) (Admin permission required) Admin Tools > Data Copy To
 Copy/Import Survey From Excel File: [Click here to Copy/Import Survey from an Excel file.](#)
 Create empty survey from this page.

After you click “Save” you will see the “Modify Survey Page” shown below. Click the “Insert Item” button to add your first question to the survey.

On the “Create New Item” page you first choose a question type from the dropdown. The dropdown holds all of the different question types. Note that each question type has multiple formatting options once you add it to the survey. Selecting an item from the dropdown will display your options for adding that item. You can also copy an item you already added, or choose an item from a library.

For instance, here we chose **One Answer (Option Buttons)**:

Create New Item

* = Required

Choose an Item Type

Choose from over 35 question item types, including auto sum matrix, dynamic row, ranking, drop-down lists, open-ended

 Warning

Answer Alignment *Select the way answers should be aligned on the page

Select whether an answer is required

As you progress down the page – you will also see options for horizontal or vertical display.

Next, there is a drop down for answer option groups. This is optional, when you select from the drop down it will populate the answers with the text for the group selected.

The “Default” radio button is to set a specific answer to be pre-selected as the default answer.

The “Points” box is for entering points that you would like calculated on the reports related to the answers chosen.

The “Alias” box is for an abbreviation of the answer text that will show on the reports such as the export.

Some question types also have option to include an “other, please specify” option – you can change the text in the box, or make it a file upload question or a comments box question. In addition, you can specify if you want this additional answer validated with or without the “required” validation.

Answer Alignment *Select the way answers should be aligned on the page.

Vertical (Horizontal) Answers Per Row: 5 (default 5)

Answers

Select answer choices. Select a group of answers.

Agree - Disagree go

Enter the answers.* Enter each of the answers in the text box.

For Icon Question Types Only:

Icon Class (the ex: fa fa-check fa-2x (choose any icons from font awesome))

Icon Color Class (can be a different class for each column so each column can have a different color)

Specify Colors in Survey Template CSS clear

1	Strongly Agree	<input type="radio"/> Default	5	points	Alias:		Icon Class:		Icon Color:	
2	Agree	<input type="radio"/> Default	4	points	Alias:	A	Icon Class:		Icon Color:	
3	Neutral	<input type="radio"/> Default	3	points	Alias:	N	Icon Class:		Icon Color:	
4	Disagree	<input type="radio"/> Default	2	points	Alias:	D	Icon Class:		Icon Color:	
5	Strongly Disagree	<input type="radio"/> Default	1	points	Alias:	SD	Icon Class:		Icon Color:	

Allow additional answer or file upload

Check this box if you would like an additional "Other" prompt in the text box below.

Other, please specify

Select horizontal or Vertical for answer alignment

Optional Points

Optional Alias for Reports

Type in box or choose from preset answers

Question Types

The basic question type categories are described below.

Open Ended Question Types:

Question types that allow the respondent to enter open ended text answers.

Choice Question Types:

Question types that allow respondents to select from predetermined answer options.

Matrix Question Types:

Question types that contain one or more columns and rows.

Presentation Question Types:

Question types that display or highlight information to the respondent.

Database Query Question Types:

Question types that allow you to type in a database query to select the items that show up in the list of answer options.

Touch Question Types:

Question types that are specific to kiosk, ipad or touch screens. Note that all question types work on these devices, these are just specific to this presentation type.

Random Question Types:

Question types that display a random image or a random message out of a group of images or group of messages that you have created. The random image or message that was shown is listed in the reports with the answers to that question.

Choose Question Type

The steps that follow will vary based on the type of question you chose. There are 42 different question types, and each has multiple options. To pick a question click “Insert” on the modify survey page and you will see a drop down box similar to the below to pick a question type from:

Choose from over 42 question item types, including auto sum matr

Choice - True/False GO or Co

- Please Select --
- Choice - Database Checkboxes
- Choice - Database Dropdown
- Choice - Database Options
- Choice - Multiple Answers (Checkboxes)
- Choice - One Answer (Dropdown)
- Choice - One Answer (Option Buttons)
- Choice - One Answer Per Row (Icons)
- Choice - True/False**
- Choice - Yes/No
- Matrix - Dynamic Row
- Matrix - Multiple Answers per Row (Checkboxes)
- Matrix - Multiple Answers per Row (Text/Dropdown)
- Matrix - Multiple Answers per Row (Textboxes)
- Matrix - One Answer Per Row (Icons)
- Matrix - One Answer per Row (Option Buttons)
- Matrix - Rating Scale (Numeric)
- Matrix - Rating Scale Slider (Numeric)
- Open Ended - Calculated
- Open Ended - Captcha

Enter the question alias. Enter alternate text for use in the report

- **Choice - Database Checkboxes**

Entering your dynamic database query returns rows for checkbox list.

1. Select the survey:

- EVENT RECAP FINAL 6-9-2014
- COPY of EVENT RECAP PROXIMO - old
- Manage Suppliers and Products Start Page for Lezlie
- Edit supplier logic - do not delete
- Event RECAP copy - old version

Question

Enter the question. * Use this field to enter the text for your question or input prompt.

Rich text editor toolbar with options for Bold, Italic, Underline, ABC, Format, Font family, and Font size. Below the toolbar is a text area with the placeholder text "Select the survey:". A yellow callout bubble with a pointer to the text area contains the text "Enter Question Text here".

Enter the question alias. Enter alternate text for use in the reports. If blank, the actual question will be displayed.

Text input field for the question alias.

Enter the sub-text. Enter informational or additional text to display below the question.

Text input field for the sub-text.

Show Database Filter Button

Check to show database filter button that will launch filter selection pop up to filter question item answers.

Select the database connection DSN: (add these in admin tools)

StudioDReader [Add Database DSN Connections](#)

Enter the SQL. *The SQL must contain two columns aliased as ItemValue and ItemDisplay. ItemDisplay will be the value shown in the dropdown, ItemValue will be the answer value. In most cases this *ex: SELECT Country AS ItemDisplay, Country AS ItemValue FROM Countries

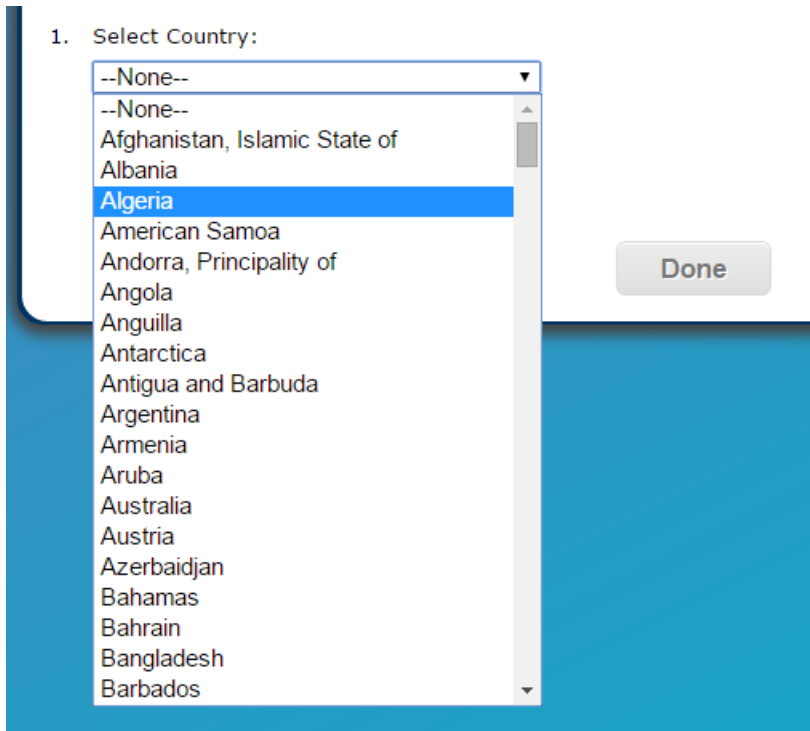

The SQL can contain a piping token, for example: WHERE (dbo.myTable.myID = ###442###). In the above example the piping token "###442###" would be replaced with the item answer value of item 442 in your survey database.

Text input field containing the SQL query: `select top 5 title as ItemDisplay, title as ItemValue from sur_survey`. A yellow callout bubble with a pointer to the text area contains the text "Dynamic Query".

- *Note: This is only for SQL database lookups, this is covered in the Power User Class.*

- **Choice - Database Dropdown (Populate from DB or Web service)**

Entering your dynamic database query or web service returns rows for dropdown box.

Enter the question alias. Enter alternate text for use in the reports. If blank, the actual question will be displayed.

Enter the sub-text. Enter information for the question.

Select the web service token in this box as the source from populating data.

External Web Service/API Select the 3rd party Web Service/API: (add these in admin tools)

country [Add Web Service Tokens](#)

Enter Arguments (if any) for the Web Service/API call. Enter Arguments, if any, in the format required by the third party web service, ex: 123,456 or "Jane Doe", "Acme"

The arguments can contain piping tokens, for example: ###442###,###443###

In the above example the piping token "###442###" would be replaced with the item answer value of item 442 in your survey before

External Database Select the database connection DSN: (add these in admin tools)

--Select Database DSN Connection (set up in admin tools)-- [Add Database DSN Connections](#)

Enter the SQL. *The SQL must contain two columns aliased as ItemValue and ItemDisplay.

ItemDisplay will be the value shown in the dropdown, ItemValue will be the answer recorded in the database. In most cases this will be

*ex: SFI FCT Country AS ItemDisplay, Country AS ItemValue FROM Countries

- *Note: This is only for SQL database lookups, this is covered in the Power User Class.*

- **Choice – Database Options**

Entering your dynamic database query returns rows for radio buttons.

- *Note: This is only for SQL database lookups or populating from web service, this is covered in the Power User Class.*

- **Choice - Multiple Answers (Checkboxes)**

Respondent can select multiple boxes, and optionally you can display an open ended textbox or comments box, or file upload for the “other” option. Points can be assigned to answer options.

1. Example of Choice - Multiple Answers (Checkboxes) Question Type.
Please select each College Class that you took in 2013:

- English 1
- English 2
- English 3
- Composition
- Journalism
- Other, please specify

- **Choice - One Answer (Dropdown)**

Respondent can only select one answer. Points can be assigned to answer options.

2. Example of Choice - One Answer (Dropdown) Question Type
Please select how hard the last semester was for you:

- **Choice - One Answer (Option Buttons) (“Likert Scale”)**

Respondent can only select one answer. Points can be assigned to answer options.

3. Example of "Choice - One Answer (Option Buttons) Question Type. This is typically used as a "LIKERT SCALE".
 Strongly Agree Agree Neutral Disagree Strongly Disagree

4. Example of "Choice - One Answer (Option Buttons) Question Type. This is typically used as a "LIKERT SCALE".
 Strongly Agree
 Agree
 Neutral
 Disagree
 Strongly Disagree

- **Choice –Icons**

Respondent can only select one answer. Points can be assigned to answer options.

3. Pick your favorite car

- **Choice - True/False**

Respondent can only select one answer. If you need points assigned, use the choice dropdown and enter "true" and "false" as the options instead of this question type.

5. Example of "Choice - True/False" Question Type.

The sky is blue.

Select whether you think this statement is true or false.

6. Example of "Choice - True/False" Question Type.

The sky is blue.

Select whether you think this statement is true or false.

True

False

- **Choice - Yes/No**

Respondent can only select one answer. If you need points assigned, use the choice dropdown and enter "yes" and "no" as the options instead of this question type.

7. Example of "Choice - Yes/No" Question Type.

Is the sky blue?

8. Example of "Choice - Yes/No" Question Type.

Is the sky blue?

Yes No

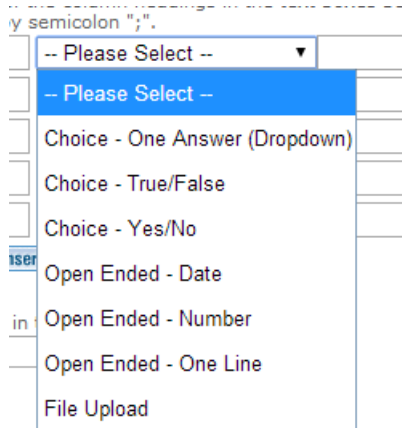

- **Matrix - Dynamic Row**

By default only the first row shows. Respondent clicks the green plus icon to add additional rows, or the red minus icon to remove rows.

4. Example of "Matrix - Dynamic Row" Question Type.

	Address	Phone	Office Manager
Office 1	<input type="text"/>	<input type="text"/>	Mr. Smith ▼
Office 2	<input type="text"/>	<input type="text"/>	Mr. Smith ▼

Column types are: Choice – One Answer (Dropdown), Choice – True/False, Choice – Yes/No, Open Ended – Date, Open Ended – Number, Open Ended – One Line, File Upload.

- **Matrix - Multiple Answers per Row (Checkboxes)**

Respondent can select multiple boxes in each row and column. Row text can be dynamically displayed.

10. Example of "Matrix - Multiple Answers per Row (Checkboxes) Question Type.

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
Row1	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Row2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Row3	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- **Matrix - Multiple Answers per Row (Text/Dropdown)**

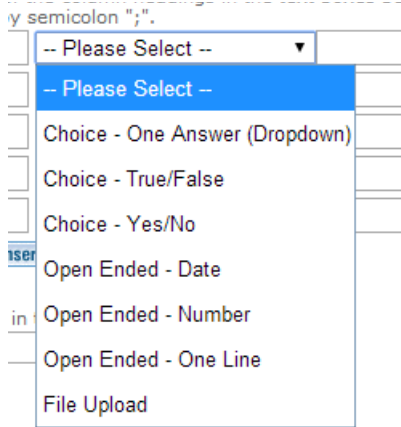

Multiple question types in each column. Row text can be dynamically displayed.

11. Example of "Matrix - Multiple Answers per Row (Text/Dropdown)

This question allows different question types in each column.

	Class	Date	Semester	Teacher
Row 1	Math1 ▼	MWF1 ▼	Fall ▼	<input type="text"/>
Row 2	Math1 ▼	MWF1 ▼	Fall ▼	<input type="text"/>
Row 3	Math1 ▼	MWF1 ▼	Fall ▼	<input type="text"/>

Column types are: Choice – One Answer (Dropdown), Choice – True/False, Choice – Yes/No, Open Ended – Date, Open Ended –Number, Open Ended – One Line, File Upload.

You can set the matrix column width for these column types as shown below.

Columns

Column headings and types. * Enter each of the column headings in the text boxes below and select column types. Enter dropdown values or min and max text values in a next column. Separate values by semicolon ";".

For Icon Question Types Only:

Icon Class (the ex: fa fa-check fa-2x (choose any icons from <http://fontawesome.github.io/Font-Awesome/icons/>)

Icon Color Class (can be a different class for each column so each column can have separate hover colors, etc.)

Specify Colors in Survey Template CSS

1 Enter Column Name -- Please Select -- Alias: Icon Class: Icon Color:

2 Enter Column Name -- Please Select -- Alias: Icon Class: Icon Color:

insert new answer

Column width. Enter the width, in pixels, of the columns (default 300)

Set column width here

- Matrix - Multiple Answers per Row (Textboxes)**

Optional to show row auto totals or column auto totals. Optionally can specify a total value for rows or columns to validate against.

12. Example of "Matrix - Multiple Answers per Row (Textboxes)

	Job1	Job2	Job3	Job4	Job5	
Row1	5	5	5			15
Row2	5					5
Row3	5					5
	15	5	5			

- Matrix - One Answer per Row (Icons)**

Respondent can only select one radio button per row. Rows can be dynamically generated.

- **Matrix - One Answer per Row (Option Buttons)**

Respondent can only select one radio button per row. Rows can be dynamically generated.

13. Example of "Matrix - One Answer per Row (Option Buttons)"

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
Row1	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Row2	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Row3	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

- **Matrix - Rating Scale (Numeric)**

Respondent can select only one radio button per row.

14. Example of "Matrix - Rating scale"

	1	2	3	4	5
Row1	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Row2	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Row3	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

- **Matrix Rating Scale Slider (Numeric)**

Respondent can slide select one number value per row.

Save this code, which is required to update your response at a later time. _____

1. Rate the below from 1 to 5 (1 is bad and 5 is good)

	1	2	3	4	5	
School Lunches Bad						School Lunches Good
School Staff Bad						School Staff Good
School Facilities Bad						School Facilities Good

- **Open Ended – Calculated**

This question displays a dynamically calculated number calculated from piping tokens or formula that you type in, and displays it to the respondent.

7. Your body mass index is:

○ Note: This is covered in the Power User Class.

- **Open Ended – Captcha**

16. Open Ended - Constant Sum

Row1

Row2

Row3

- **Open Ended – Date**

Optionally displays current date. Respondent can use the date picker, or iphone/phone date selector (html5 is used depending on the browser/phone being used by respondent). If you need alternate entry formats, use the open ended one line question type instead.

5. Please enter the date of the training:

9/1/2014  mm/dd/yyyy

- **Open Ended – Number**

For number entry of integers, decimals, currency, Euros. Select the number masking format from the options, or leave blank for the default for any number format. Respondent can fill this question type with bar code reader/scanner.

6. Example of "Open Ended - Number" Question Type.

\$

- **Open Ended - Number Slider**

Specify minimum and maximum number for the slider range and default value.

17. Example of Open Ended - Number Slider

- **Open Ended - One Line**

Specify default value (can use piping token from prior question to prepopulate). You can also specify the field width and the maximum characters allowed for respondent to enter. Respondent can fill this question type with bar code reader/scanner.

18. Open Ended One line

- **Open Ended - One or More Lines**

Respondent can enter 255 characters per line. For longer text, use the comments box question type.

19. Open Ended One or more Lines

Row1

Row2

Row3

- **Open Ended – Ranking**

Specify the starting and ending ranking numbers that the respondent must rank with.

20. Open Ended Ranking

Rank the items below, using numeric values starting with 1.

Row1

Row2

Row3

- **Predefined - User Registration**

This question type actually creates a user in the survey system with a “user” role, which can only take surveys. Users can see surveys they are editing, or were invited to in the user workspace. Users can edit their contact information but cannot see any other admin pages besides taking surveys. If the user is already logged in, the question prepopulates with their information.

21. Predefined User Registration

User Account Information

User Name	<input type="text" value="admin"/>
Password*	<input type="password"/>
Reenter Password*	<input type="password"/>
Title	<input type="text"/>
First Name	<input type="text" value="Joe"/>
Last Name	<input type="text" value="User"/>
Email Address	<input type="text" value="JoeUser@YourCompany.com"/>
Reenter Email Address	<input type="text" value="JoeUser@YourCompany.com"/>

Other User Account Information

- **Presentation – Heading**

The heading is used to separate or organize the look and feel of the survey. The style of the text is determined by the survey template that is specified on the survey options page.

Section 1: Work History

- **Presentation - Horizontal Rule (HR)**

The horizontal rule is a thin line that goes across the page of the survey separating the questions.

The presentation message is for normal sized text to determined by the Survey Template that you have ch

Section 1: Work History

- **Presentation – HTML**

This question type allows you to paste in any html to display to the respondent. For example, you can paste in PayPal donate button, purchasing buttons/links, maps for directions, youtube videos, dynamic content from other web sites, links to document downloads, videos, or music.

To add HTML, click the blue “HTML” button in the rich text box to open the html editor.

- **Presentation – Message**

The presentation message is used to separate or organize the look and feel of the survey. The style of the text is determined by the survey template that is specified on the survey options page.

The presentation message is for normal sized text to display inline with the survey. The style of this text is determined by the Survey Template that you have chosen for the survey.

- **Presentation - Sound (Full)**

This has all of the sound controls to replay the sound file.

- **Presentation - Sound (One Time)**

This only plays the sound one time and hides all of the other controls.

- **Random Image**

Random image is displayed to respondent from a group of images that are defined by the survey administrator.

- When building a survey, "Random Image" is now a question type
- When selected, this question type functions similarly to the standard question type of "Presentation Image", but rather than uploading a single file it allows the programmer to select from the "Random Image Groups" that have been created
- When a survey respondent is taken their survey and arrives at this question, the tool will randomly select 1 image from the specified "Random Image Group" to display
- That randomly selected image can then be held constant throughout that respondents survey using the "Pipe" functionality in subsequent questions; if the programmer intends to do so
- When exporting survey results, the data file will display the file name of the image that respondent was shown

You can upload a group of images that will be randomly shown on the survey. To manage the "groups" of random images, you can click the manage groups link after inserting the question type, or, go to admin tools > manage random groups

- **Random Message – Single Choice Options**

Random message is displayed to respondent from a group of messages that are defined by the survey administrator.

When building a survey, "Random Message; One Answer (Option Buttons)" is now a question type

- When selected, this question type functions similarly to the previous custom question, but now utilizing the "Random Message Group" defined earlier

- When a survey respondent is taken their survey and arrives at this question, the tool will randomly select a predetermined number of text-based messages from the Excel file associated with the “Random Message Group”
- These messages will appear as answer choices to a question, with an option button below each
- Respondents may only select a single answer choice
- Their single selection may then be pulled into a subsequent question using the “Pipe” functionality in subsequent questions; if the programmer intends to do so
- When exporting survey results, the data file will display the actual text of the message that respondent selected; including when piped forward to subsequent questions

You can upload a group of text messages that will randomly be shown on the survey.

To manage the "groups" of random images, you can click the manage groups link after inserting the question type, or, go to admin tools > manage random groups With messages you import from excel file.

Each time this question type is used within a survey on a different page, different random messages (answer choices) will be shown

- Randomly selected messages (answer choices) will only remain constant across multiple questions on the same page
- A respondents single selection of a messages (answer choice) may then be pulled into a subsequent question using the “Pipe” functionality in subsequent questions; if the programmer intends to do so
- During a respondents single survey instance, the same message file will never be randomly selected more than once (meaning that a respondent will never see the same random message twice unless specified by the survey programmer using the “Pipe” functionality or by having multiple questions of this type on the same page)
- Across the course of a study, the survey tool will to the best of its ability ensure even distribution of all statements within a Random Message Group Excel file across the total sample of respondents
- When exporting survey results, the data file will display the actual text of the message that respondent selected; including when piped forward to subsequent questions

- **Respondent File Upload**

Respondent can upload one file at a time. For multiple files, use the matrix text/dropdown or dynamic row matrix with the file upload column type.

3. Please upload your resume.*

Edit Item

Insert a New Question on a New Page

Your survey can contain an unlimited number of questions distributed amongst any number of pages. You can also copy existing items and then edit them. Below shows the different item actions.

The screenshot shows a survey editor interface. At the top, there is a title "Test Survey" and a button labeled "Options". Below the title, there is a text instruction: "Click on the 'New Pg' button to add a new item on a new first page." and a button labeled "New Page". The main content area shows a question titled "[No Title Entered]" with a button labeled "Edit Page". Below the question, there is a list of items. The first item is "1. What version of Excel are you using?" with two radio button options: "Excel 2003" and "Excel 2007". A yellow callout bubble labeled "Item actions menu" points to a dropdown menu that is open over the "Excel 2007" option. The menu contains the following options: "Insert Item Above", "Insert Question Condition", "Insert Hide Condition", "Edit Item", "Delete Item", "Copy Item", "Move Item", and "Pipe Item".

- Click **Edit** to edit an existing question.
- Click **Delete** if you decide that you don't want this question anymore.
- Click **Copy** to copy the question, then you can edit it to save time.
- Click **Move** to change the order of the question.
- Click **Pipe** if you'd like to display the question answer in the text of questions on subsequent pages

Add Page Conditions

Before you begin...remember this:

- Plan ahead and insert all of your pages and questions first, deleting pages and questions will delete any page conditions associated with them.
- Insert page conditions on the page FOLLOWING the questions that will trigger them.

- Don't overcomplicate – pages AUTOMATICALLY go from one page to the next and you don't need to add page conditions to go forwards. Most of the time you only need one page condition to hide a page determined by a prior answer. Keep it simple.
- Multiple Page conditions – When you have multiple conditions they are evaluated with “AND” unless you change the “group” in which they are evaluated as “OR”.

Examples:

“AND” example: Hide page if Question 1 = yes OR question 2 = yes (this would have 2 different groups) By default all page conditions go under the same group number – which means each one has to evaluate to true in order for the page condition to trigger to hide the page.

“OR” example: Hide page if Question 1 = yes OR question 2 = yes (this would have 2 different groups)

Existing Page Conditions

Page conditions in the same group are evaluated together with an AND operator. Each group is evaluated with other groups using an OR operator. To evaluate all page conditions, use a single group number.

“SKIP TO PAGE” conditions will over-ride “NO SKIP” page conditions, so with that in mind, they should be separated on different pages.

“NO SKIP” page will SHOW the page if the condition is TRUE and HIDE the page if the condition is FALSE.

Loop conditions are automatically created when you select a page condition that skips to a page prior to the current page. This will cause the flow of the survey to go backwards to the skipped page then forwards again repeatedly until the loop condition is not met anymore.

Edit	Page	Group	Question or Token	Operator	Answer	Row	Condition	Skip To Page	Skip To End	Loop Page	Delete
<input type="button" value="edit"/>	2	1	test	=			True	show page	N	N	<input type="button" value="delete"/>

Insert a Page Condition

Create a page condition by selecting a question from a prior page, and then specifying the operator and answer in the form below. Note that the Provided and Did Not Provide operators do not require an answer.

Create Condition based on Question Answer OR Token

Token:

Question:

Operator:*

Answer:*

Row: (matrix only)

Group:

Skip to:

Note: Skip to End of survey means it skips to the completion page of the survey, so that completion logic can execute.

Email Trigger Page Conditions

Email trigger page conditions trigger the sending of an email when a certain question is answered a way that you specify. Email triggers are configured the same way page conditions are configured. Under the “Page” drop down, select “Add Email Trigger” or “View Email Triggers” to add or modify and email triggers for that page.

These emails are separate from the built in “Completion Email” that is configured on the “Survey Options” > “Completion” tab. These emails are also separate from the ActiveLogic workflow emails configured in ActiveLogic that are sent only on survey completion.

Deploy Your Survey

One way to send your survey to a group is to paste the URL in an email to them. If your survey is open to anyone, you can allow anonymous access (no log in required).

Click **Deploy** and copy the URL assigned to the survey (you'll notice the **Survey ID** within the URL)

You can also use import an email list and send through the system. If you would like to do this, after selecting **Deploy**, select **Email Lists** and you can import or create a list to deploy to. This function will also let you set options to track completions and edit the email message.

You can also use any 3rd party email system to deploy the survey via the Email Lists page.

You can also deploy by SMS Text to yourself, and forward to a SMS Text list from your phone.

Note: Email Lists/Email List deployment are covered in the “Power User Training”

Deploy Survey

This page supplies the URLs for deploying your surveys.

[Click to Review and Approve Survey Design](#)

Send Survey Invitations by Email

Deploy 'Test Survey' Survey

To Send Invitations via the SelectSurvey E mail List Utility Select the Use E mail List button below. Email lists allow you to send a dynamic link to the Survey that offers you the ability to use Data Piping to insert any of the e mail list data into the survey. If instead you need to deploy a static link via web page, pop up, or want to use your desktop e mail program use the link below based on purpose.

[Email Lists](#)

Specify Custom Survey ID

Only letters and numbers are allowed. NO spaces, punctuation, or XML or HTML characters are allowed which could potentially break the survey link.

[Save Custom SurveyID](#)

Email Link

To send a link to your survey via email, simply copy the link below and paste it into your email.

External URL (Default Internet)

Internal URL (Intranet) (Set in Admin Tools)

Web Page, Pop-up, or Email Links

Web Page Link

To embed a link to your survey in a web page, copy the link below and paste it into your web page in the desired location. You can change the name of the link in the text below.

Deploy Tiny URLs

There is also a URL Rewriter feature at the bottom of the deploy page, where you can specify a short/clean URL: (This is covered in the Power User Training)

URL REWRITER

Create a clean short URL.

Example:

`http://localhost/SelectSurvey/ClientName`

instead of:

`http://localhost/SelectSurvey/TakeSurvey.aspx?SurveyID=123`

Existing Custom URLs for this Survey:

Route Name	Route URL	Route Physical File	Route Survey ID	Delete
------------	-----------	---------------------	-----------------	--------

You do not currently have any URL routes.

URL Shortcut Path Text: No spaces, empty values or special characters allowed, this will be used in the URL path. Example:

`http://localhost/SelectSurvey/ClientName`

`http://localhost/SelectSurvey/`

Add URL Route

Monitor the Responses

You can see a quick summary of the response count for each survey on the **Manage Surveys** page under the Comp/Incomp. Column which lists the completed responses / incomplete response.

For additional reports – click the “Analyze” icon, and you will see the reports menu for that survey.

Active Surveys
Set Default Folder on User Preference

Warning - clicking "Clear" will permanently delete all responses.

Reports

SelectSurvey provides several report generators on the **Reports Menu**, giving you an ability to generate a number of standard and custom reports, including:

- all surveys taken by a particular user or response id
- summary of all responses for a survey
- the ability to:
 - **toggle** through **each response** to a survey
 - **select** which **questions** you want to display on the **report**
 - **analyze trends** by **comparing** two different **surveys**
 - **combine multiple surveys** for combined results on **one report**

- **create your own custom reports**
- **export data to CSV or XML** in several different export configuration formats
- **automatically populate an uploaded PDF with acro fields**

You can use a number of available options to create a report to suit your needs.

Click **Analyze** to see the reports menu for that survey. You will see the below report options:

- Results Overview

Print Reports

There are print buttons on all of the reports. You can also print out a blank survey from the modify survey page print screen.

Export Data

Click **Export Data** to export the data to CSV (Excel) or XML format.

- Choose the **Export Format, Data Format and Response/User Data**
- If this is a “scored” survey you can include the sum and point values
- Click **Export**

Export Data

Export Data for Survey 'validation focus'

This page exports data in CSV (Excel) or XML format for the selected survey. Standard question and answer data is always exported for each report. To export, first select an export format. Next, select a data format. Then, optionally, select additional fields of response and/or user data.

Export Encoding

Western European (Windows)

Multi-Answer Delimiter

SEMICOLON (;)

Only applies to multiple answers inside one column. (User Responses Only) Example:
"1 = Below Average;2 = Average;3 = Above Average"
"1 = Below Average,2 = Average,3 = Above Average"

Report Filters

Manage Filters

0 filters

Active Report Filters: None Active.

Export Format

- CSV (Excel)**- Export data to CSV (Excel) Format. This allows for easy opening and editing using Microsoft Excel.
- XML**- Export data to XML. This format is commonly used by data reporting applications such as Crystal Xcelcius.
- TXT**- Export TEXT ANSWERS ONLY (open ended comments box only) to text format, with one text answer per row ordered by question order, with no other information (all other options will be ignored). This format is for copying text comments into a word doc report.

Data Format

- User Responses**- Export each user's response as a row, with one column per question.
 - Show [No Answer Entered] instead of blank. (User Responses only)
- Individual Responses**- Export each answer as a row, with multiple rows for multiselect questions.
- SPSS Format Extended**- Export each response as row, one column per possible answer to each question.
- SPSS Format Condensed**- Condensed single option answers, selected options as '1' or '0'.

Note: The question "alias" (if one is assigned) will export as the column/question identifier.
Note: Remove empty responses if desired, in admin tools using "database validation tool".
Note: If respondent closes browser without answering any questions the empty response is counted in "total count".

Custom Reports

Custom reports to create, save and email Custom Reports, limit reporting to specific questions and report filters and lets you specify graph type for each question. They also allow you to view all text responses on the same report, unlike the overview report summary, where you have to drill down to see text responses.

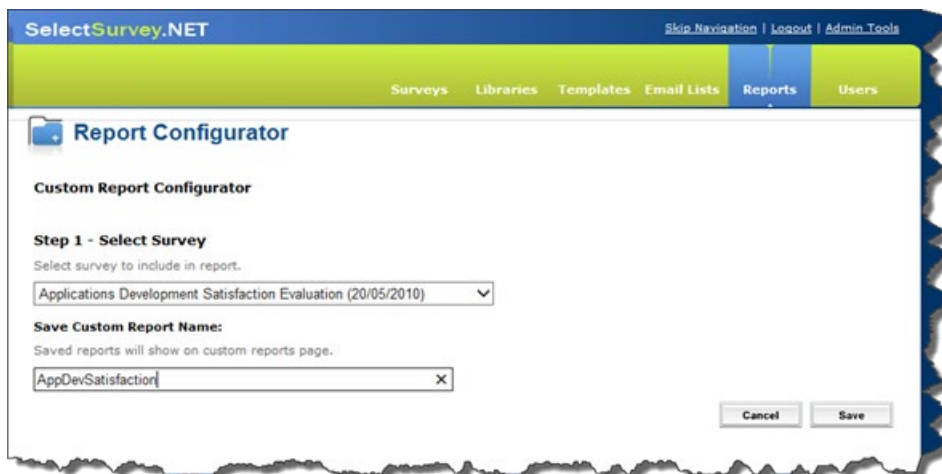

Custom reports also have html and PDF view/print options (2.0 .net framework or greater). You can save and edit custom report configurations and share the results with others. If you intend to share the results with others you must enable this feature first and then create a report share list.

Step 1 – Create the report

1. Click **Create New Custom Report** button to open **Report Configurator**

2. Select the survey from available surveys
3. Enter a name for the report (you can have multiple reports based on the same survey)
4. Click **Save**

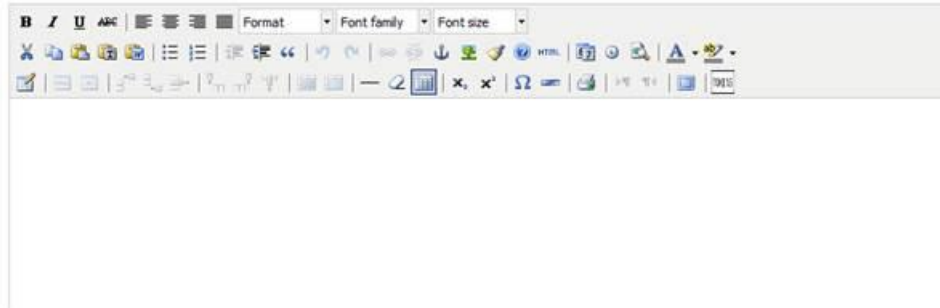

5. Select ALL options from Custom Report Configurator for selected report
 - Access Type
 - Anonymous or Login

Anonymous
Login Required (Report Share Login or higher)

6. Add report Introduction (your own text which will appear above the other data)

Use the below to enter your own text which will appear above the other data, click the "T" button in the menu for available text replacement tokens.

Step 2 - Select and format question items to include in report

1. Select questions to display on your report (you can select one or more questions)
2. Set the format for each selected question.

<input type="checkbox"/>	Page	Question Item	Format	Show Individual Text Responses
		Thank you for the time you are taking to complete the Applications Development Client Support Satisfaction Survey! We value your honest opinions regarding our work. The first few questions deal with the handling of your recent project/service support request. You will then have the opportunity to comment on your overall Applications Development experience. Please note: If you would prefer to speak directly with us about your experience with our applications development, please call Cathy Hugo, Research & Performance Support Services Manager, on 4924 6433. Thank you!		
<input checked="" type="checkbox"/>	2	Project/Service Title	Bar Graph	<input checked="" type="checkbox"/> Yes
<input checked="" type="checkbox"/>	2	Project/Service Start Date	Bar Graph	<input checked="" type="checkbox"/> Yes
<input checked="" type="checkbox"/>	2	Project/Service End Date	Bar Graph	<input checked="" type="checkbox"/> Yes
<input checked="" type="checkbox"/>	2	Applications Developer	Pie Chart	<input checked="" type="checkbox"/> Yes
<input checked="" type="checkbox"/>	2	Service Team		<input checked="" type="checkbox"/> Yes
<input checked="" type="checkbox"/>	2	Please provide a short description of the responsibilities and/or roles the Applications Developer fulfilled for your team.	Bar Graph	<input checked="" type="checkbox"/> Yes
<input checked="" type="checkbox"/>	3	Please rate your satisfaction with the delivery of completed "###8347###" project/service on each of the following.		
		How satisfied are you with the:		
<input checked="" type="checkbox"/>	3	The work performed	Pie Chart	<input checked="" type="checkbox"/> Yes
<input checked="" type="checkbox"/>	3	The project/service results	Pie Chart	<input checked="" type="checkbox"/> Yes
<input checked="" type="checkbox"/>	3	Explanations of technical subject matter	Pie Chart	<input checked="" type="checkbox"/> Yes
<input checked="" type="checkbox"/>	3	The written materials provided (contracts, documentation,	Pie Chart	<input checked="" type="checkbox"/> Yes

*******In order to view the pie chart/bar graph reports you must set the Report Display type to Group Result format when creating the Custom Report.**

Step 3 - Select report properties

You can include number of addition properties with the report. Available information depends on survey set up. For example, you will not be able to view IP Address, Username, or Email Address if you ran the survey in forced Anonymous.

Step 3 - Select report properties

Select the report properties to display in the report:

Point Display for Matrix:
 Hide Matrix Columns for Points, Point Average, Hide Matrix Row for Point We Answer text (will still display row for Point Average)
 Hide Point Columns/Rows

Survey Properties:
 Total Respondents Launched Date
 Status Display Hidden Fields Launch Date

Response Properties:
 Username IP Address Date Started
 Time Started Date Completed Time Completed

User Properties:
 First Name Last Name Email Address
 Company Current Position Location

Email List Properties:
 Email First Name Email Last Name Email List Address
 Custom Data 1 Custom Data 2 Custom Data 3

You can include number of addition properties with the report

Step 4 - Save report

Click **Save** button to save report.

Reports are filtered by: ALL Surveys

Delete	Report Name	Date Created	Edit	Send	Report Sharing	Access Type
<input type="checkbox"/>	2009 Quality Exposition Registration	4/08/2009			<input type="button" value="enable"/>	A
<input type="checkbox"/>	2010 Quality Managers Forum Consultation 031209	10/12/2009			<input type="button" value="enable"/>	A

NOTE: When you first create a new report it will be disabled for view until you manually enable it. Make sure to click Enable button when you are ready to see and share results with others.

Step 5 - Run the report

Click on the name of the report you created under **Report Name** to see results (samples show below)

HNELHDSelectSurveyClientSatisfaction

Survey Title: HNELHD SelectSurvey Client Support Satisfaction Survey

Responses By Question Analysis:

NOTE: You can add your own text to custom reports which will appear above the other data.

1. When you needed support or information; did you usually?

2. Who dealt with your request or query?

3. You were satisfied with the courtesy of the IT staff member contacted

12. Do you have any additional comments about your experience or suggestions on how we can improve?

Since having a lesson from John and his advice on how to fix a few things, I discovered that one of my colleagues had also had experience in using

1. Select Survey and she sat with me for 30 minutes to assist with selecting the questions that I needed and the appropriate field for what I needed to capture.
2. Very helpful.
3. No
4. Do you offer face to face training. Sometimes a one day face to face training course is better served than reading the manuals which are a little daunting.
5. This is a great resource. I think that it is perhaps now widely known about through the area and it is of great benefit. Perhaps some more publicity about it would be good.
6. Do you run classes in survey design?
We need a user friendly software as consumer feedback is vital, and much research requires survey responses. SelectSurvey is not my first choice. IT knowledge excellent, however support is limited by what the staff member has on which could sometimes be frustrating. It would be good to have someone help one on one as some of the issues are hard for a casual user.
IT person's emails were sometimes very long and technical
John has always provided excellent service but there was a couple of times I needed assistance when he was away and no one else could
- 7.

Text responses

Step 6 – Share reports

You can share produced reports with your colleagues by using saved email lists.

1. Click **Send** button in **Reports Menu** to set up and send the email with selected report

Reports are filtered by: ALL Surveys

Delete	Report Name	Date Created	Edit	Send	Report Sharing	Access Type
<input type="checkbox"/>	HNE/LHD Select Survey Client Satisfaction	12/11/2013		Y	disable	A
<input type="checkbox"/>	AppDev Satisfaction	12/11/2013		Y	disable	A
<input type="checkbox"/>	Allied Health Form 2013	12/11/2013		Y	disable	A

2. Select **Email List** and apply any required filters

Email Custom Report

Step 1 of 2 -- Email Custom Report

Specify the email recipients by selecting an email list. You may optionally filter the email addresses in the selected email list using the filter options below.

Select Email List

Select the email list to which the email message should be sent.

-- Please Select --

Apply Filter

Send to all email addresses

Send to email addresses that match:

Active: No

Email Address:

Custom Data 1:

Custom Data 2:

Custom Data 3:

You may want to further filter the email addresses in the list by only sending to recipients who match specific criteria; for example, only managers.

Cancel Continue

3. Click **Continue** button
4. Set up **Message Details**

Once you have sent an email to an email list, you can send a follow up email to that email list.

From the manage email list page, click the messages icon to view sent messages.

Default	Email List Name	Addresses	Messages	Edit	Delete	Import	Export	Send
No	itech test	 1						

Then, from the Email Message List page, click the send follow up button.

Sent Date	Survey Name	Email Subject	Response Count	Sent Count	Send Follow-Up	Details	Archive
1/5/2015	email data token test	testing from 20 demo	3	1			

This brings up options for sending a follow up message, as seen below.

 **Send Follow Up Message****Step 1 of 2 -- Select Statuses for Follow-Up Message**

The subject of the original email message was 'testing from 20 demo'. Each recipient of the this email message has a status of No Response, Declined, or Responded. You can send a follow-up to the original recipients of this email message based on their current status. You must select at least one status from the list below.

Select Statuses

Select at least one status from the list below.

- Write EID URLs to File** - Does not send email, writes unique URLs to file. This will write the sent history to the table for tracking with the EID link from a third party email program.
- No Response** - Recipients who have not clicked on or responded to the original email message.
- Responded** - Recipients who have clicked on the link to the original email message.
- Completed** - Recipients who have completed the survey linked in the original email message.
- Declined** - Recipients who responded by declining to take the survey.
- Exclude Opt-Outs** - Exclude recipients who clicked to opt-out.
- Exclude In-Active Emails** - Exclude emails that were de-activated after the original email was sent.

Send Follow up Message

Step 2 of 2 -- Follow-Up Message Details

All fields marked with a red asterisk (*) are required. You can personalize your email by including tokens in it, as described below. When finished, click the Send button to send the email to the designated recipients.

Survey Name:	test
Email List Name:	debug email list This List was Last Sent on: 5/26/2016 5:01:37 PM With Email Subject: test
Pre-Populate Message:	<input type="radio"/> Default <input type="radio"/> From Prior Email <input type="radio"/> From Email Template
Send Date:	Enter the date and time that you want the follow up emails to be sent on. 06/09/2016 <input type="button" value="Calendar"/> Now <input type="button" value="v"/>
Email Subject:*	<input type="text" value="Enter the subject of email"/>
'From' Name:	Enter the NAME that you want to show that the email is being sent from. <input type="text" value="Enter the NAME that you want to show that the email is being sent from."/>
'From' Address:*	Enter the email address that the email should appear to come from. <input type="text" value="Enter the EMAIL address that the email should appear to come from."/>
Email Text:*	<input checked="" type="radio"/> HTML <input type="radio"/> Plain Text Note: Make sure you check both email boxes, both HTML and Plain Text are always sent in multi-part mime, email client for recipient determines which message is displayed.

Free Form Reports

Free Form Reports are intended for 360 style aggregate score reporting. Typically an entire graphical report from Word or Excel is pasted into the textbox, then the scored/aggregate numbers are replaced

by the "Survey Score and Sum Response Tokens", or the "360 Tokens" from the menu bar in the rich text box labelled "TOKENS". There are SCORE and SUM tokens for each cell of a matrix or question type that has points assigned to it, so that you can take a single column/row and aggregate those totals separately from the rest of the question. When the report is viewed, the tokens are replaced by the real time numeric calculated data from the responses.

To access the 360 Reporting tokens, click the "TOKENS" button in the rich text box on the report configuration page. Tokens available for question grouping and 360: Note that the 360 Question Categories, GAMP, ISO and Practice Levels must be set in the survey design for these tokens to work. The question category, practice level, GAMP and ISO can be set on the edit item page or the manage question categories page. See 360 Question Groups/Categories.

TOKEN	CHART TYPE
###RAD=SP###	Specific Practice Radar Chart
###GML=GP###	Generic Practice Final Levels Chart
###SML=SP###	Specific Practice Final Levels Chart
###PL=GP###	Generic Practice Response Breakdown Chart
###PL=SP###	Specific Practice Response Breakdown Chart
###SR=GAMP###	Response Breakdown Chart
###SR=ISO###	ISO Response Breakdown Chart

TOKEN	INDIVIDUAL VALUE DESCRIPTION
###SC=[see token menu]	Score Tokens
###SB=[see token menu]	Score Sub-Item Row Sum Tokens

###SL=[see token menu]	Score Column Sum Tokens
-------------------------------	-------------------------

###SN=[see token menu]	Score Cell Tokens
-------------------------------	-------------------

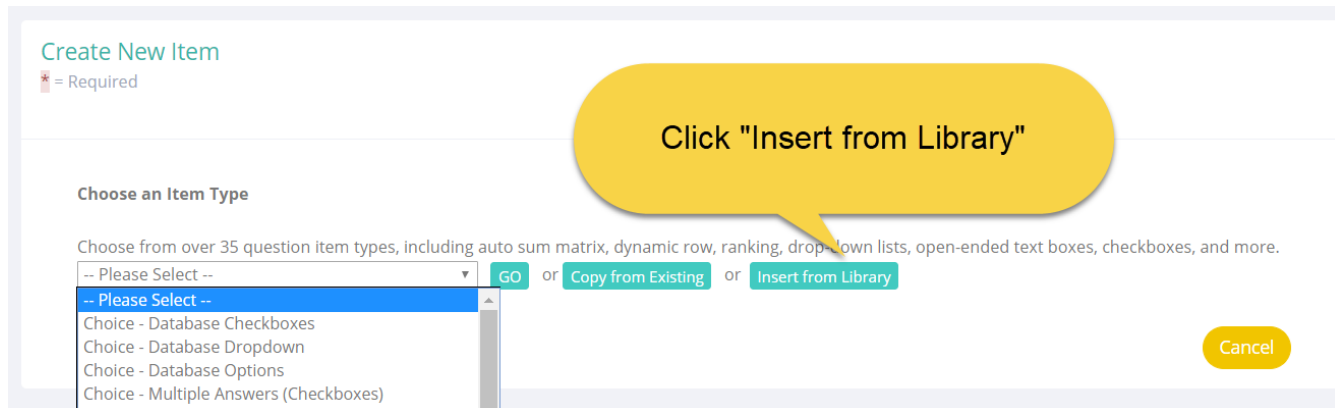

Question Library

You can create questions and keep them in a “Library” so that you can use them over and over again.

1. Click **Libraries**
2. Click **Create New Library**
3. Name the Library
4. Insert all of the questions that you’d like to include in this library

Now, when you are designing a survey click **Insert From Library** to select the question from the Library.

Organize Your Surveys into Folders

If you have a long list of surveys placing them into folders will help you stay organized.

From the Manage Surveys page click **Manage Folders**

☰ SELECTSURVEY.NET V5.0

The screenshot shows the SELECTSURVEY.NET V5.0 interface. On the left is a dark sidebar with navigation items: Dashboard, Workspace, Surveys, Survey Folders (highlighted), Polls, Libraries, Templates, Email Lists, Reports, and Users. The 'Survey Folders' menu is expanded, showing options: Manage Folders, Create Folder, Edit Folder, and Set Default Folder. The main content area features a teal '+ Create' button, a dropdown for 'Active Surveys' (set to '--All Surveys--'), and a table with 'Manage' and 'Status' columns. The table contains several rows with 'CLOSE' buttons and 'Open' status.
